The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,2,3,4,8,9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gerding et al. 1625359 in view of Peng 5,207,333.

Gerding et al. teach a bottle carrier having a rectangular bottom frame having support bars having pockets for supporting spherical bottles. Absent is the hinge and limiting means.

Peng teaches a collapsible carrier with hinges connecting upper and lower levels and means for limiting movement of the hinges.

To provide Gerding et al. with hinge connections and limiting means as taught by Peng for the purpose of providing compact foldability and stability would have, in view of Peng, been obvious for one having ordinary skill in the art at the time of the invention.

Claims 5,6,7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Similar carriers are illustrated by Larimer et al. 7,168,580; Bennett 6,059,127; Levy 5,033,758; Tersch et al. 5,370,245.
